

Financial News Sentiment Analysis — PERT Chart

IST 495 · Agentic AI Internship · May 5 – Aug 15, 2026 · Critical Path = 15 Weeks

Node	Event	Timing	What's Done by This Point
1	Project Start	May 5, W1	Internship begins
2	Dev Environment & Architecture Ready	May 19, W2	Python env, libraries, FinViz CSV loader, IBKR/TDA accounts, architecture decided
3	RSS Feeds Live	Jun 2, W4	All 8 RSS sources (Reuters, CNBC, MarketWatch, DJ, PR Newswires, ACCESS Wires, FinanceWire, Global Newswires) ingesting
4	Scrapers + Broker Feeds Connected	Jun 2, W4	BeautifulSoup scrapers for TradingView, FinViz, SEC EDGAR, FDA; IBKR + TDA news feeds working
5	Text Processing + Ticker Matching Done	Jun 16, W6	HTML stripped, language filtered, timestamps UTC-normalized, regex ticker extraction vs FinViz CSV complete. All paths merged.
6	Sentiment Engine Live	Jul 14, W10	FinBERT scoring on CPU, VADER fallback, CrewAI orchestration (Claude.ai / ChatGPT), source trust weighting, time-decay applied
7	Ranked Ticker List Ready	Jul 21, W11	Per-ticker weighted aggregation in SQLite, message density counted, composite ranking (score × density) working
8	Flask Dashboard Live	Aug 11, W14	FinViz-style sortable table, 60-second auto-refresh polling, pop-up window with per-ticker sentiment + articles
9	Project Complete — Pipeline < 2 min end-to-end	Aug 15, W15	End-to-end latency verified < 2 min, sentiment accuracy checked, code documented, final demo delivered to supervisor

Activity	Arrow	Duration	Description	Path
1.1	1 → 2	2 weeks	Python setup, FinViz CSV loader, account setup, architecture design	Critical
2.1	2 → 3	2 weeks	RSS feed integration — 8 sources (feedparser)	Critical
2.2	2 → 4	2 weeks	Web scrapers (BeautifulSoup) + IBKR/TDA news feed connection	Parallel

3.1	3 → 5	2 weeks	HTML stripping, language filter, UTC timestamps, regex ticker extraction	Critical
—	4 → 5	0 weeks	Merge: scrapers/brokers data joins the main pipeline at node 5 (dummy activity)	Parallel merge
4.1	5 → 6	4 weeks	FinBERT model (CPU batch), VADER fallback, CrewAI + Claude.ai/ChatGPT, source trust + time-decay weighting	Critical
5.1	6 → 7	1 week	Per-ticker weighted score aggregation, message density calculation, composite ranking	Critical
6.1	7 → 8	3 weeks	Flask + Jinja2 sortable table, 60-sec auto-refresh (polling), pop-up detail window	Critical
7.1	8 → 9	1 week	End-to-end latency test, sentiment spot-checks, code documentation, final demo	Critical
